

TOMS RIVER WOMAN RECIEVES ANSWER TO PRAYER

Lillian Capone of Toms River had spinal surgery for repair of a ruptured disc in 1997 – she now found herself in agonizing pain once again and facing the possibility of more surgery. “I was afraid I would never be able to live without pain and the doctor I was seeing told me that surgery was my only option.”

After seeing the amazing results of her husband Dan, who had low back pain and problems for 46 years and was now pain free after undergoing treatment using the DRX 9000, Capone was hoping this procedure would also help her. “I was in so much pain when I came to Dr. Zammito’s office that I needed the help of two people just to walk up the ramp. I was so afraid that if I was not a candidate for this treatment, I would be faced with having surgery once again.” After determining that her condition could be helped and she was a candidate, Capone admitted: “ Even after seeing the amazing results with Dan, I still wondered how I would ever be helped and was hoping and praying for a miracle.”

But after only 2 weeks, her pain subsided dramatically and after finishing the program, she is now pain free. “ It’s absolutely amazing...I cannot believe how great I feel. I can do anything now without pain. I thank the Lord – this was the answer to my prayers.”

Jersey Shore Low Back Center headed by Dr. Kenneth Zammito was the first clinic in Ocean County to introduce this advanced technology using the DRX 9000 spinal decompression system. The DRX 9000 was developed by scientists, doctors and engineers and marketed by Axiom Worldwide, a Tampa-based company that focuses on new medical technology. The machine relieves pain associated with herniated, bulging or protruded discs, degenerative disc disease, posterior facet syndrome, spinal stenosis and sciatica. It achieves these effects through decompression of the intervertebral discs and posterior joints, that is, unloading due to distraction and positioning. “ It basically allows the reverse flow of nutrients and fluids back into the disc to restore structure and function,” Zammito added. “ After 20,000 DRX treatments over 6 years, we’ve seen some pretty amazing things, but the one thing that amazes me the most is the long term results we see from this procedure. Our first 2 patients that were treated in 2003 are still virtually pain free to this day.”

Dr. Kenneth Zammito heads the Jersey Shore Low Back Center in Forked River. The phone number is **(609) 693-2020** for any back pain concerns or issues and pain evaluation to see if you may be a candidate for the DRX 9000. Dr. Zammito has also made available a free special report detailing everything you need to know about non-surgical decompression (a recorded message available 24 hrs.) by calling **(800) 659-3282** or visit **www.jshoredrx.com**

Dr. Kenneth Zammito adjusts the controls of the DRX 9000, a non-surgical spinal decompression machine that treats low back pain, while Lillian Capone completes her treatment.
